

## 2016 PROSPECTIVE PRODUCT CONTENT LABEL

Green Power Switch Southeastern RECs is a voluntary renewable energy program from Tennessee Valley Authority and participating local power companies. The product is sold in megawatt-hours (MWh) with a minimum purchase of 2,000 MWh/year. The product is made up of the following new renewable resources.

| <b>Green-e Energy Certified<br/>New<sup>2</sup> Renewables<br/>in Green Power Switch</b> |                                  | <b>Generation Location</b>       |
|--|----------------------------------|----------------------------------|
|  | 2016<br>(projected) <sup>1</sup> | 2016<br>(projected) <sup>1</sup> |
| Wind   | 100%                             | IL, IA, KS or TN                 |
| <b>Total</b>   | <b>100%</b>                      |                                  |

1. These figures reflect the power that we have contracted to provide. Actual figures may vary according to resource availability. We will annually report to you before August 1 of next year in the form of a Historic Product Content Label the actual resource mix of the electricity you purchased.

2. New Renewables come from generation facilities that first began commercial operation within the past 15 years.

For comparison, the current average mix of resources TVA has purchased or generated includes: Coal (32%), Nuclear (33%), Natural Gas (14%), Hydroelectric (11%), and Other (10%). [Source: TVA CY2015]

The average home in the Tennessee Valley uses 1200 kWh per month. [Source: Energy Information Administration]
